About Me

I am a growth-oriented professional with 4 years of experience in the field. My approach is autonomous and passionate in everything I do. I have the ability to take ownership of projects and adapt easily to different environments. My leadership allows me to drive solutions and ideas effectively, while my critical thinking enables me to analyze, define, and prioritize tasks efficiently. I always face challenges with a positive attitude and a smile. I am constantly in search of challenges that push me and a team of people who share the same ambition for continuous improvement.

- English B1
- Italian B1

SKILLS SUMMARY

- HTML, CSS, JAVASCRIPT
- REACTJS, TAILWINDCSS
- NODEJS, EXPRESS
- MONGODB, MONGOOSE
- TYPESCRIPT
- NEXTJS

EXPERIENCE

Debts Web Application 2022

I developed a debt management web application that enables two users to maintain an organized record of their debts. I utilized technologies such as Node.js, Express.js, MongoDB with Mongoose, React, and Socket.io for real-time updates. I implemented a user permission system to control access to debts based on roles. This enhanced efficiency and provided a real-time user experience.

Local Business Web Application 2023

I developed a comprehensive web platform for the management of a local business, utilizing leading technologies such as Node.js, Express.js, MongoDB with Mongoose, and React. Additionally, I used Tailwind CSS for designing the interface, resulting in a highly efficient and modern solution. This platform facilitated daily sales tracking, statistical analysis of sales, personnel monitoring, inventory management, among other functionalities, significantly contributing to the enhancement of business operations.

EDUCATION

Informatic science University | Cuba Engineering 2010

Platzi Online technology school 2020-2023

Here, I gained experience in cutting-edge technologies through studies on Platzi and online resources, including reading documentation. This has allowed me to acquire a deep understanding of the technologies I apply to develop comprehensive applications with advanced features.
